CARACTÉRISTIQUES

Wolf induction technology offers consistent, precise temperature control and nearly instantaneous temperature adjustment response

Every induction zone features Boost Mode for quick boils. The new 5500-watt zone supercharges Boost Mode to heat liquid in even the largest pots with incredible speed

Sturdy knobs mimic the experience of cooking with gas, offering precision across the temperature range. Flick past the highest setting to quickly engage Boost Mode

Slick ceramic glass surface resists scratching, staining, and impact; because the cooktop stays relatively cool, spills wipe off easily

The Bridge function joins two induction zones into one large area, enabling use of an induction-capable griddle, open roaster, or fish poacher

Wolf's Dual VertiFlow™ convection system provides reliably even heat, reduces hot and cold spots, and enables consistent multi-rack cooking
